

### Solid Bronze Cement Tools.

The Iowa Novelty Co., Burlington, Ia., are offering the trade a line of Solid Bronze Cement Tools, several of which are illustrated. These Bronze Tools are claimed to outwear either cast iron or steel; each tool is highly polished and fitted with a hardwood handle. The anti-rust feature eliminates the necessity of cleaning the tools after using. The company also make a line of Cast Iron Cement Tools, which are nickel-plated, nicely wrapped and packed. The illustration shows the position and use of some of the tools used in the construction of cement walks and steps. Referring to the illustration, No. 4 is Out-curve Edger; No. 6, In-Curve Edger; No. 8, Corner Trowel; No. 10, Straight End Jointer; No. 12, Jointer, and No. 14, Edger. The company's catalogue gives full particulars concerning each Tool. The concern makes an assortment of 35 tools used for finishing walks, steps, driveways, gutters, curbing, etc., thus
